

Industry Custom Pricing (ICP) – Participating Industries

Industry Custom Pricing (ICP) is an important part of our performance pricing strategy. It is designed to increase accountability among employers while offering flexibility to industry to determine how their premium rates are set. Pricing programs can provide greater incentive to reduce injuries and lower claim costs. Safer workplaces produce better outcomes for workers and ultimately lower premiums and the cost of doing business for employers.

ICP emerged from stakeholder consultation on experience rating, and since 2008, industries have had the option to participate in this program. Some key facts:

- 44 per cent of all industries (148 out of 337) participate in ICP
- One-third of the provincial workforce is covered by employers participating in ICP, making up approximately \$27 billion in insurable earnings

Below is a current list of industries that have chosen to participate in ICP.
