Appeals system - Understanding the review/appeals process

This half-day seminar provides employers with an overview of WCB's appeal structure and process including how to initiate, prepare and present a claim or premium related appeal.

Return to Work training

This half-day seminar helps employers understand the relationship between claims costs and WCB premiums. Provides a step-by-step process to assist employers with building their own modified work programs. Designed for management, supervisors and individuals involved in the health & safety coordination and claims/disability management within the organization.

Preventing workplace violence

This three-hour seminar provides information for employers who are interested in developing a workplace violence prevention program.

Employer information

This half-day general information workshop discusses the fundamentals of workers' compensation. Topics include: subcontractor liabilities, who is a worker, insurable earnings, managing your workers' compensation account and the impact of claim costs on premiums.

Modified duties

This half-day workshop will assist employers with the development of a modified work program. Modified work is the most effective and efficient way to safely assist an injured workers' return to work, and to manage injury related costs. However, identifying modified duties or knowing how to design a return-to-work program can be difficult. This interactive workshop is designed to provide: the framework and tools needed to develop, implement or improve a modified work program; guidelines and tools to assist in the return to work of an injured employee and; ideas and examples of appropriate modified duties.
