

## Vestibular Rehabilitation course

Millard Health | September 18–20, 2026  
Instructor: Bernard Tonks, BScPT, FCAMPT

### Course overview

Millard Health is pleased to partner with **Bernard Tonks** to deliver this practical, evidence-based vestibular rehabilitation training for healthcare professionals who support patients with dizziness, vertigo and balance disorders.

The training is especially valuable for clinicians working with patients, including injured workers, as timely and accurate diagnosis and effective management of vestibular conditions can significantly affect recovery, functional outcomes and return-to-work planning. The course is **open to all healthcare disciplines** and is applicable across all practice settings.

### Introductory vestibular rehabilitation course

Assessment and treatment of common vestibular disorders including benign paroxysmal positional vertigo, and unilateral and bilateral vestibular loss. Includes oculomotor testing, balance and gait assessment, differential diagnosis, concussion-related dizziness, case studies, videos and hands-on practice.

### Advanced vestibular rehabilitation course

Designed for clinicians with prior vestibular training. Focus on refinement of skills, complex and central causes of dizziness (e.g., migraine-associated vertigo, superior canal dehiscence, cervicogenic dizziness), concussion management, video review and clinical case discussion.

### Course fees & schedule

*All sessions run from 8:30 a.m. to 4:30 p.m. A reduced fee applies to livestream participants, as in-person attendees benefit from guided, hands-on training delivered within a realistic, simulated clinical environment.*

Date	Course	Duration	Delivery	Fee <i>GST not included.</i>
Fri, Sept. 18–Sun, Sept. 20	Combined course (Introductory + Advanced)	3 days	In-person only	\$825
