GENERAL GUIDELINES FOR PROVIDING DENTAL SERVICES

1. All dental services, other than the examination, and emergency treatment, must be authorized before treatment is commenced. The WCB Dental Report must be completed after the first examination, along with a cost breakdown of the proposed treatment. The WCB Dental Report and cost breakdown must be submitted to the Board, preferably by fax, within two business days of the initial examinations. Although pre-authorization is required in all cases, it is particularly critical in the event of proposed treatment for TMJ dysfunction and implants.
2. The WCB responsibility for dental care is limited to the restoration of dental function to the pre-accident state. The addition of refinements to obtain a better cosmetic result is not the WCB's responsibility. Dentists should take into consideration the oral health of the worker prior to finalizing a treatment plan.
3. **Workers cannot be billed directly under the Workers' Compensation Act (WCA) (Section 86). No part of the cost of any treatment provided to or in respect of a worker related to the compensable injury is payable by the worker.**
4. The WCB will only pay for dental services provided to workers who are entitled to benefits under the WCA.
5. The investment in extensive and costly dental restorations should not exceed what the average worker would reasonably be expected to provide for himself. All TMJ treatment and dental implants must be pre-authorized by a WCB Dental Advisor.
6. Dental implants will be considered on an individual case-by-case basis, following review by the WCB Dental Advisor. The following may be considered in each case:
 - Implant warranty offered by the treating dentist,
 - Oral and general medical health of the worker,
 - Smoker or non-smoker,
 - Age of the worker,
 - Whether the success of other dental treatment is dependent upon the implant,
 - Alternative treatment options.
7. Replacement of implants will be limited to once every 10 years if ongoing responsibility is accepted.
8. Where the worker's dental condition is extremely compromised, the cost of total extraction and replacement with dentures may be authorized where it appears to be a better alternative than repairing the specific work related injury. Replacement will be limited to once every five years if ongoing responsibility is accepted.
9. Pre-accident oral hygiene status will have some bearing on the authorization of dental procedures and must be reported to the WCB. Dental scaling and polishing is not ordinarily covered, unless pre-authorized.

10. The cooperation of all members of the Alberta Dental Association & College in following these guidelines is appreciated and will assist in avoiding delays in payment and potential conflict with the WCB. Dentists must bear in mind that they and all health care providers are bound by the WCA.
